Breathing issues (e.g. asthma, history of respiratory infections) If you have a new cough, when did it start? Date: Time:						
What support would you need to have a swab taken? Have you had any change in skin colour? With a person with a new cough or fever?						
Physical observations (what support would you need to have your blood pressure and temperature checked)						
Someone who knows you well (this should be someone that we can talk to about your care and treatment) Name: Relationship:						

Acute Liaison Nurses—Ben Haywood-Noble (Harrogate) 01423 553690. Karen Pearce (York) 07917 184539. Jo Blades (Scarborough) 07795 126473. Elizabeth Dixon (Northallerton) 01642 850850—extension 52241

## **Temperature Record**

The most common symptoms of coronavirus (COVID-19) are:

- a new, continuous cough
- a high temperature (37.8 degrees and above)

You may find it useful to check you temperature regularly. You can use the table to record your temperature. Try to take your temperature at the same time each day.

	date           • • • • • • • • • •           • • • • • • • • • •           • • • • • • • • • •           • • • • • • • • • •           • • • • • • • • • •           • • • • • • • • • •           • • • • • • • • • • •           • • • • • • • • • • •           • • • • • • • • • • • •           • • • • • • • • • • • • • •           • • • • • • • • • • • • • • • •           • • • • • • • • • • • • • • • • •           • • • • • • • • • • • • • • • • • • •	date           u         u      u         u           u         u           u         u           u         u           u         u           u         u           u         u           u         u           u         u <th></th>	

If you have symptoms of coronavirus and need medical advice, do not go to places like a GP surgery, pharmacy or hospital, use the NHS 111 coronavirus service.
