

# North Yorkshire Falls Conference 2015

## Information for Delegates

The morning session will consist of a series of presentations.

The afternoon session will include two workshops. The first one will be looking at a range of “products” – following a presentation about them.

You will be asked to sign up for one of these when you arrive on the day so you might want to think about which is most appropriate for you beforehand.

They are:

- Screening/Trigger Tool – to identify older people who may be at risk of falls
- Multi-Factorial Falls Risk Assessment – an assessment that identifies the risk factors for an individual and should lead to a range of interventions to eliminate or reduce these risks
- Quality Standards for Hospital – based on the NICE guidance on falls and hip fractures
- Quality Standards for Care Homes, Extra Care Housing and Domiciliary Care – to assist these services in preventing and managing falls.

The second workshop will be based around CCG areas and you will be allocated to these groups.
