

Building Resilient Communities

Leah Swain
Rural Action Yorkshire

What is a Resilient Community?

In the context of winter health a resilient community is:

- ✓ Able to use available resources and community assets to keep residents safe, well and warm
- ✓ Proactively planning how the community can improve the health and wellbeing of all residents
- ✓ Prepared and able to respond to, withstand and recover from adverse situations

How can we support community resilience?

- Support communities to be selfsupporting and maintain their own wellbeing
- Support communities be prepared for, and respond to, emergencies and adverse situations
- Provide clear signposting to services that can help residents stay healthy

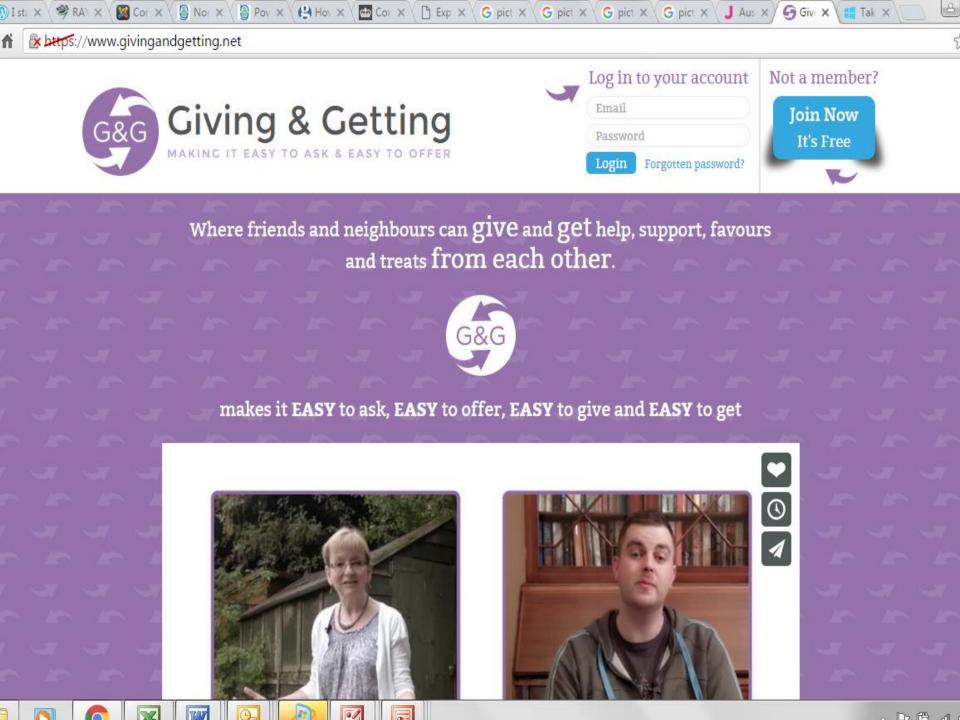

Support communities to be self-supporting and maintain their own wellbeing
