# You asked... Where are Safe Places in North Yorkshire?

In Phase 1 of the Safe Places project we got council, health and community places involved

We got people to sign up for Safe Places

So far, we have 186 businesses and organisations, and 92 people signed up as members

This website shows all the Safe Places that have been registered: <https://www.safeplaces.org.uk/>

There is also the National Network for Safe Places

# You asked... Are Safe Places being used?

I get monthly reports from SSP which show me if registered Safe Places have any visits by members of the public OR if an organisation or person wants to join the scheme

NYCC Community Cohesion Officers are visiting Safe Places in Scarborough & Skipton to talk to staff to see if Safe Places is working.

We need to visit the other parts of North Yorkshire to find out if Safe Places is working

# You asked... How can we increase the number of Safe Places?

We want more people to know about Safe Places

We want more places to become a Safe Place

We need to tell everyone about Safe Places

We think we should have a new communication plan to help us do this

# You asked... how do we move to Phase 2 and include commercial businesses?

We need to make sure Phase 1 of Safe Places is working well

Once we are happy that Phase 1 is working well, we can think about Phase 2

We think we may be able to move to Phase 2 by the beginning of next year

# How can you help? We need your ideas!

1. Can you help to visit Safe Places to see if they are working?
2. What are your ideas to get more Safe Places?
3. What are good ways to tell people about Safe Places?
4. Can you help us to plan Phase 2, when we go out to find Commercial Businesses to be Safe Places?
